Our greatest strength over the 30 years of success is our long term team members. Without their loyalty, dedication and skill none of these products would be possible.

Thank you for all they have done.

## CORPORATE PROFILE

- Anchor Bolt & Screw Company has been in business for over sixty years as a manufacturer and stocking supplier of standard and specialty fasteners.
- The per print division specializes in both metric or inch parts, metal or plastic fasteners or complete components, metal stampings or injection molded parts including plastic, rubber, PVC, and Delrin material. From prototype to production.
- Corporate location in Elgin, IL includes sales and purchasing offices, quality control and test labs and up to 80,000 sq. ft. of warehouse space.
- Corporate warehouse locations also in Lafayette, IN., Mooresville, NC., and a new sales office in Brooksville, FL.
- State of the art graphics department with up to date computer technology for your graphic design from small job to large.
- Partnership with fourteen manufacturers worldwide, four in China, two in Taiwan, one in Malaysia, one in Russia, and six plants besides ourselves in the U.S.A.
- Tier two production part supplier to the automotive industry with a Kan-Ban return container system in place.
- Major stocking supplier for over twenty manufacturers (see reverse)
- Manufacturer of Poly Seal T-Nuts and Bolts in optional colors for the truck body/ truck trailer manufacturing groups.
- For a competitive bid on quality parts, competitive pricing and quick lead times  
fax us your RFQ to 847-841-7997

# ROD ENDS HEIM JOINTS

## Rod Ends Technology Specification:

- Hardness of steel ball is about 58~64 HRC, it rotates freely and out bearing does not loosen.
- Hardness of linkage body is modulated to 20-24 HRC.
- The linkage body and thread surface is free from fraction, corrosion rust and other forging imperfection.

## Heim Joints

## Technology Specification:

- Round smoothly with stagnation.
- Ball clearance: axial straight angle direction 0.025~0.065 mm, axial clearance  $\leq 0.3$  mm
- Thread precision: Grade 6H
- Ball shaft: steel 40Cr.
- Ball housing: 45# steel.

# RETENTION COATING

## The Advantages are Clear

- Can be applied to both threaded and unthreaded fasteners
- Temporarily holds fastener in place during fabrication, assembly, and transportation
- Positioning application only
- Soft enough to allow hand assembly
- Non-toxic, assembler friendly
- Environmentally friendly
- Provides a solution for robotics riveting type production
- Can be located at any point on fastener length
- Speeds assembly time
- Requires no additional features
- Cost effective
- Not affected by gasoline

Available in including colors  
White, Green, Clear

5/16-18x2-1/2	188919787-01F							
5/16-18x3**	188919817-01F							

\*\*For 5/16 diameter lengths over 3", we stock Tri-Lobular T.F.S. up to 6 inches long. See page 2 of our catalog for pricing.

\*\*\*Type "F" screws drive better than T.F.S. in repair application due to rust on the beams. The type "F" flute removes the rust from the threads as it is being driven, which prevents the fastener from binding and breaking.\*\*\*

## MOLDED ENCAPSULATED HEAD OF SOLID AND SEMI-TUBULAR RIVETS

We take standard parts and put an encapsulated head on it for protection and appearance.

### ADVANTAGES

- Head will not rust
- Half the price of stainless steel
- Steel is much easier to set (roll over)
- Better appearance
- Available in any color to match your application
- On steel parts we can also add high corrosion platings up to 10,000 hours of salt spray

## MOLDED ENCAPSULATED HEAD MALE AND FEMALE RIVETING SYSTEM

We take standard two piece riveting system and encapsulate the tubular rivet.

## ABM PANELOK™

Anchor Bolt & Screw Co. has taken the worry out of FRP and door hardware fasteners with the uniquely designed, built-to-last ABM Panelok™ System.

Our years of experience have allowed us to engineer this part for extra strength and durability. The ABM Panelok™ has been proven to outlast all other door and FRP hardware currently available in the market.

Often imitated, never duplicated.

**ABM Panelok™ Bolts** – This modified FRP bolt has been designed to provide a low profile, large diameter head and radius fillet for an even pressure clamp load. It has been designed with an undercut radius. The locking feature on this part provides a chemical bond with the accompanying T-Nut. The ribbed neck provides a lock into the hinge or FRP panel to prevent unwanted twisting.

	<b>7/8</b>	<b>1</b>	<b>1-1/4</b>
5/16-18			

**ABM Panelok™ T-Nut** – This special T-Nut has been designed with a low profile head and a T-55 Torx® (or equivalent 6 lobe) drive to make this a tamper resistant fastening system.

## **NEW ERA IN RUST PROTECTION**

"**The next best thing to stainless steel**" an upgrade to your plated steel parts. We currently supply various fasteners and other components that will reach **4,000 hour salt spray** for a clear silver finish and close to **4,200 hours** for a yellow dichromate finish.

ECC has concluded our testing, and are now offering our new coating that will achieve **10,000 PLUS hours**.

Engineered Components Company has been an **INNOVATOR** in achieving the highest salt spray results in our industry.

Our economy has been faced with runaway prices for stainless steel components. All forecasting for future costs have been thrown out the window. We believe prices will continue to fluctuate for the unforeseeable future.

Greater demands are being put on the corrosion resistance of plated steel components. Higher salt spray results are required by original equipment manufacturers across the country.

**ECC WOULD BE PLEASED TO COAT AND TEST SAMPLES OF ITEMS YOU WISH TO CONVERT**

**THE NEXT BEST THING TO  
STAINLESS STEEL  
4,000 HOURS & 10,000 PLUS HOURS SALT SPRAY**

## BOTTOM RAIL BOLTS

A Bottom Rail Bolt, also known as the cross member bolt, is a structural bolt used in the assembly of truck trailers. These bolts are used to fasten and hold the bottom rail and the side wall to the cross member. These bolts are designed to be strong, fasten tight, and remain tight.

## TRUCK BUMPERS

Made from Virgin Rubber  
Not Recycled Materials

SIZES AVAILABLE	PART #	21	63	105	210	420
8X5 Standard 4 Hole	F9999920-R03					
6x2-3/8 Standard 2 Hole	F9999770-R03					

### 1/2-20x2 TORX® or 6-LOBE PAN "F" TCS CAD SELF TAPPING BUMPER BOLT

PART #	500	1,000	2,500	5,000	10,000
F9026744-02					

Thread cutting screw for mounting bumpers in blind or open applications

### NYLON DRIVE RIVET WITH ALUMINUM OR STEEL PIN

SIZES AVAILABLE	PART #	1,000	2,500	5,000	10,000	25,000	50,000	100,000
3/16 x 3/4 with Steel Pin	4460116							
1/4 x 3/4* with Alum. Pin	6110645							

These two parts are made from DuPont Zytel 101

Other sizes available

\* 1/4 x 3/4 equal to SOUTHCO #30-20-542-25

### TORX® or 6-Lobe Flat Head Steel Machine Screw Grade 5.1— Plain

SIZES AVAILABLE	PART #	500	1,000	2,500	10,000	25,000	50,000
3/8-16x5	F8721927-96						

The above part can be cut to length and threaded to whatever length you require.

### STEEL WHEELS

ECC Part#	Outer Thread	Inner Thread	Length	Type	100	250	500	1,000	2,500	5,000
EC1-80701-07	1-1/8-16	3/4-16	2-7/32	Right Hand						
EC2-90701-07	1-1/8-16	3/4-16	2-7/32	Left Hand						

### STEEL WHEELS EXTRA LENGTH

ECC Part#	Outer Thread	Inner Thread	Length	Type	100	250	500	1,000	2,500	5,000
EC3-63353-07	1-1/8-16	3/4-16	2-9/16	Right Hand						
EC4-73353-07	1-1/8-16	3/4-16	2-9/16	Left Hand						

### STANDARD OUTER NUTS

Zinc & Yellow  
 For Steel or Aluminum Wheels

ECC Part#	Thread	Hex A.F.	Height	Type	100	250	500	1,000	2,500	5,000
EC5-19873-07	1-1/8-16	1-1/2	7/8"	Right Hand						
EC6-29873-07	1-1/8-16	1-1/2	7/8"	Left Hand						

Inner caps Also Available for Aluminum Wheels

### M22 WHEEL BOLT AND NUT for piloted hub tractors and trailers

	PART #	100	250	500	1,000	2,500	5,000
M22 Nut	F0899000-0182						
M22 Bolt	F1834999-01						

### WHEEL NUTS (60°) Grade 2 Zinc

SIZE	ECC PART #	500	1,000	2,500	5,000	10,000	15,000	25,000	50,000
7/16-20	EC437-20-2-06								
1/2-20	EC500-20-2-06

## TRAILER HUB HEAT SENSOR BOLTS

4037 Steel Heat Treated

Part Number	Quantity	Description
<b>F1819581-0892-4</b>	4 Per Bag	Replaces existing hub cap bolts
<b>F1819581-0892-100</b>	100 Per Bag	*Installs in seconds with simple hand tool
<b>F1819581-0892</b>	1000 Per Bag	*Provides early warning of bearing problems, preventing costly repairs, and trailer downtime. *Provides a visual indicator that lets you know at a glance if a hub reaches 250° Your low cost insurance policy for possible hub lose or damage

*Heat Sensor Pop-Up Bolts pops up at 250°*

## SERRATED HEX WASHER FLANGE SCREWS

## STANDARD BEAM CLIP ASSEMBLIES

Sizes are Flange Thickness – Available with Many Different Cable Ties

DESCRIPTION	FINISH	CABLE TIE	PART #	CARTON QTY	1/4 CTN	1/2 CTN	1 CTN	3 CTN
1/8"-1/4" Beam Clip Assembly with 7-1/2" Cable Tie (Style 1)	Zinc/Yellow Dichromate*	7-1/2"	A110-610-90	1,000				
1/8"-1/4" Beam Clip Assembly with 7-1/2" Cable Tie (Style 2)	Zinc/Yellow Dichromate*	7-1/2"	A900-510-90	1,000				
1/8"-1/4" Beam Clip Assembly with HD 14" Cable Tie (Style 1)	Zinc/Yellow Dichromate*	14" HD	A020-710-90	1,000				
1/8"-1/4" Beam Clip Assembly with HD 14" Cable Tie (Style 2)	Zinc/Yellow Dichromate*	14" HD	A120-710-90	1,000				
5/16"-1/2" Beam Clip Assembly with HD 8" Cable Tie (Style 1)	Zinc/Yellow Dichromate*	8" HD	A610-020-90	500				
9/16"-3/4" Beam Clip Assembly with HD 8" Cable Tie (Style 1)	Zinc/Yellow Dichromate*	8" HD	A110-020-90	500				
1/8"-1/4" Beam Clip Assembly with HD 14" Cable Tie (Style 3)	Zinc/Yellow Dichromate*	14" HD	A420-020-90	500				
1/8"-1/4" Beam Clip Assembly with HD 14" Cable Tie (Style 4)	Zinc/Yellow Dichromate*	14" HD	A220-020-90	500				

### Beam Clip Advantages:

- Easy to Install
- No Grommet Needed
- No Sharp Edges
- No Welding Needed
- Great for Wire, Air Hoses, Air Tubes, Etc.
- Finishes with \* are .0005" Zinc (approx. 325 HR S.S.R.)

### HOSE CLIP WITH CABLE TIE MOUNT ASSEMBLY

Sizes are Hose I.D.

**ABS CLIPS AVAILABLE UPON REQUEST**

DESCRIPTION	CABLE TIE	PART #	CARTON QTY	1/4 CTN	1/2 CTN	1 CTN	3 CTN
3/8"-1/2" Hose Clip with 7-1/2" Cable Tie Assembly	7-1/2"	A310-001-10	1,000				
3/8"-1/2" Hose Clip with any size Cable Tie		Call for No.					

### Hose Clip Advantages:

- Not Tied Directly to Hose
- Clean Wire Management
- Can be Used to Secure Hose to Susp. Cross Tube or Axle
- Will Not Chafe Hose
- Great for Wire, Grease Lines, or Tying Up Extra Power or Sensor Wire
- Removable — Can Be Reattached

## PALNUT® FASTENERS

High Performance, Low Cost, and Lightweight

Palnut fasteners, manufactured from precision high carbon spring steel, save in initial cost, assembly time, weight and space over alternative fasteners. Palnut fasteners are available in two major groups — for threaded applications and non-threaded applications.

FOR THREADED APPLICATIONS				NEW INSERT TYPE NUTS
<p style="text-align: center;"><b>Lock nuts</b></p> <div style="display: flex; justify-content: space-around;"> <div style="text-align: center;">             Washer/capped washer types         </div> <div style="text-align: center;">             Regular type         </div> <div style="text-align: center;">             Inverted type         </div> <div style="text-align: center;">             Wing type         </div> </div> <div style="display: flex; justify-content: space-around; margin-top: 10px;"> <div style="text-align: center;">             Tension nuts         </div> <div style="text-align: center;">             Multi-thread U-nuts         </div> <div style="text-align: center;">             Acorn type/closed top         </div> <div style="text-align: center;">             Acorn type/open top         </div> </div>				<p style="text-align: center;"><b>On-sert® fasteners</b></p> <div style="text-align: center;">             Pushnut® bolt retainers         </div> <div style="text-align: center; margin-top: 10px;">  </div>
<p style="text-align: center;"><b>FOR NON-THREADED APPLICATIONS</b></p> <div style="display: flex; justify-content: space-between;"> <div style="width: 25%;"> <p style="text-align: center;"><b>Self-threading nuts</b></p> <div style="text-align: center;">             Wing type         </div> <div style="text-align: center; margin-top: 10px;">             Regular/inverted types         </div> <div style="text-align: center; margin-top: 10px;">             Washer/capped washer types         </div> <div style="text-align: center; margin-top: 10px;">             Acorn type         </div> </div> <div style="width: 25%;"> <p style="text-align: center;"><b>Pushnut® fasteners</b></p> <div style="text-align: center;">             Washer capped type         </div> <div style="text-align: center; margin-top: 10px;">             Arched rectangular type         </div> <div style="text-align: center; margin-top: 10px;">             Arched round type         </div> <div style="text-align: center; margin-top: 10px;">             Acorn type         </div> </div> <div style="width: 25%;"> <p style="text-align: center;"><b>Flat round type</b></p> <div style="text-align: center;">             Flat round type         </div> <div style="text-align: center; margin-top: 10px;">             Flat round type         </div> <div style="text-align: center; margin-top: 10px;">             Flat round type         </div> <div style="text-align: center; margin-top: 10px;">             Blind type         </div> </div> <div style="width: 25%;"> <p style="text-align: center;"><b>Acorn type/closed top</b></p> <div style="text-align: center;">             Acorn type/closed top         </div> <div style="text-align: center; margin-top: 10px;">             Acorn type/open top         </div> <div style="text-align: center; margin-top: 10px;">             Colored cap type (plastic)         </div> <div style="text-align: center; margin-top: 10px;">             Removable type         </div> </div> </div>				<p style="text-align: center;"><b>NEW INSERT TYPE NUTS</b></p> <p style="text-align: center;">For metal and plastic panels. ## TINNERMAN®

The following is a partial listing of the Tinnerman® parts that we keep in stock on an ongoing basis

### NUT RETAINERS (PARTIAL LISTING)

D-7888-1420	C-7941-1032	C-31175-5618
D-7931-832	D-7953-5618	D-31365-1420
D-7931-1024	D-7956-1420	C-31758-1032
D-7931-1032	D-7957-3816	D-31758-M508
D-7935-3816	D-7957-5618	C-33892-1420
D-7937-3816	D-7998-M61	C-33924-1420
D-7937-5618	D-7998-1420	C-33945-1420
D-7941-1024	C-30110-1420	C-33952-5618

### PLASTIC PUSH ON AXLE CAPS (PARTIAL LISTING) (The middle number is the shaft size)

C-60002-187-805	C-60008-250-805	C-60008-375-805
C-60002-250-805	C-60008-312-805	

### ROUND PUSH ON TYPE (PARTIAL LISTING)

C-12041-012	C-13727-014	C-18234-156
C-12043-012	C-14100-010	C-18234-187
C-12044-017	C-17022SS-010	

### U-NUTS (PARTIAL LISTING)

D-521-1420	D-5207-014	D-8103-832
C-575-1024	C-8032SS-832	D-9031-8
D-1303-1420	C-8031-832	D-27091-014
C-1505-1032	D-8091-632	C-45931-014

### FLAT TYPE (PARTIAL LISTING)

C-166-1420	C-7000-832	C-7000-1420
C-7000-8	C-7000-1024	C-9816-014
C-7000-10		

### GROOVELESS RETAINING RINGS (PARTIAL LISTING)

T99220-68-576	T99220SS-58-576	T99220-120-576
T99220-91-576	T99220SS-104-576	

NOTE 1: The finishes have not been added to the part number.  
 EXAMPLE -4PHOS, -3B ZINC. We can add or convert any plating or paint to whatever is needed.

NOTE 2: The "D" means the part is made in Canada (Dominion). The "C" means the part is made in Cleveland.

## TRW NORTH AMERICAN FASTENERS

### Positive Lock Wiring, Pipe and Cable Retainers

TRW is a major supplier of tried and tested, reliable wiring, pipe and cable retainers for industrial applications. We also offer a line of more focused retainers such as relay and connector retainers, tape on retainers, and fuel and brake line clips.

Shown below are standard tooled retainers readily available from our warehouse. Please contact us for samples or application engineering assistance.

#### Benefits and Advantages:

- Simple, easy assembly
- Wide range of wire harness sizes
- Broad range of application thickness
- Ease of removal for service
- Positive mounting
- Positive wire harness positioning
- Positive lock
- Prevents wire damage
- Optional application hole sealing

TRW retainers secure sensor cables

**PC 92167**  
 Cable retainer with wire position tabs for up to .375" bundle — ratchet leg for .250 hole

**PC 47636**  
 Wire bundle, pipe, cable or conduit strap — positive lock retention — ratchet leg for .250 hole — max. bundle dia. 1.5"

**PC 92010**  
 Multi-wire retainer — flat base — 2 holes for 2 heat stake studs

**PC 96690**  
 Wire, cable retainer — stop for edge mounting — ratchet leg for .250 hole — flex tab for anti-rattle

**PC 96712**  
 Pipe, cable or conduit retainer for two .125" rods — ratchet leg for .250 hole

**PC 92000**  
 Tubing, clip with stand-off for positive positioning — ratchet mounting leg for .250 hole

**PC 96979**  
 Rigid pipe clip with quick, easy flex mounting leg — fits .275 square hole

**PC 92020**  
 Large flange secures insulation combined with wire & cable — ratchet leg for .250 hole

**PC 92087**  
 Wire & cable container traps wire flush to panel. Insertion in .236 hole made easy with reverse leg fastener

**PC 92021**  
 Large pipe & cable retainer, hinge, snap tight lock — ratchet leg for .250 hole

**PC 96883**  
Wire & cable container traps wire flush to panel. Insertion in .236 hole made easy with reverse leg fastener

**PC 47316**  
Multi-wire retainer with Rosebud fastener for .250 hole — wire & fastener easily removed

**PC 96882**  
Wire harness clamp with positive flexible mounting leg — fits a .275 diameter hole — part holds 5/16" wire in corner

**PC 47664**  
Compact wire retainer cables easily inserted and holds fast — ratchet leg is for a .250 hole

**PC 47598**  
Conduit retainer with .250 leg for attachment to 3/4" tubing

**PC 47660**  
Retainer holds two 3-1/4" cables, lock-in design — ratchet leg for .250 hole

**PC 47639**  
Rigid cable and harness retainer for edge mounting — ratchet leg for .250 hole

**PC 47528**  
Multi-wire retainer with positive lock — standard ratchet fastener for .250 hole

**PC 47693**  
Convoluted retainer for 1/4" to 3/8" wire bundle or conduit — snap together ratchet fits .250 hole

**PC 47637**  
Multi-wire retainer with positive retention finger locks — ratchet leg for .250 hole

**PC 47667**  
Convoluted retainer with hinge and snap lock, can be disengaged — ratchet leg for .250 hole — part holds 1/4" to 3/8" bundle

**PC 47640**  
Miniature wire retainer for circuit boards & thin panels — snap-in leg fits .157 hole (non removable) — panel thickness .065

# sometimes "RELAXATION" IS A BAD Word

**That's what happens after the current wheel nut is tightened.**

A common problem encountered by over the road (OTR) tractor trailers is the loosening of the lug nuts on the wheels of both the tractor and the trailer. When the M22 steel is torqued to 500 ft. lbs., 1" of the stud stretches approximately .005 (5 thousandths)...Not Enough to Maintain Clamp Load. It is believed the "relaxation" problem is much greater with aluminum wheels.

The New, Patented M22 Disc Spring Wheel Nut is designed specifically to help solve this "relaxation" problem. This exclusive assembly allows .074 (seventy-four thousandths) and as low as .030 (thirty thousandths) with the Disc Spring starting at 42,000 lbs. factoring in .010 (ten thousandths) "relaxation", you will still have 40,000 lbs. of clamp load. See chart for further detail.

Part # F0899000-0182

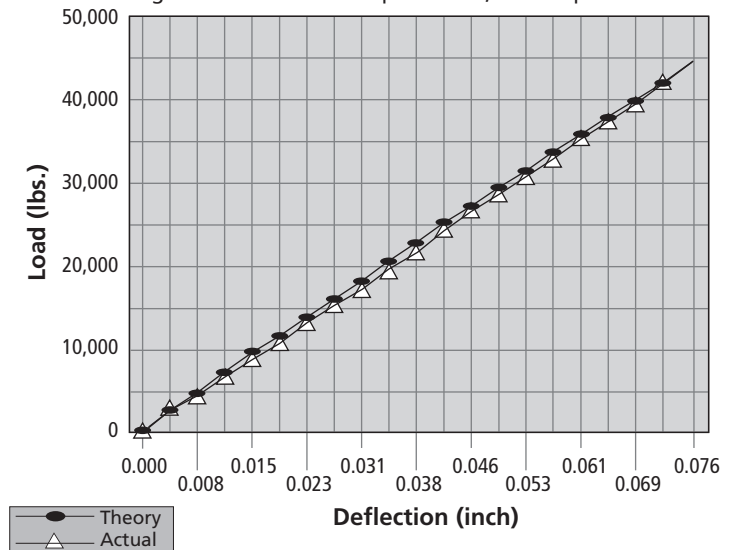

**Nut**  
Conventional M22 Nut  
*same as being used*

**Disc Spring**  
6150 Chrome Vanadium Heat treated phosphate oil and teflon dip. The Disc Spring has a crown, arch, (deflection) of .074

## Load Vs. Deflection

Theoretical Vs. Actual

Tightened to flat 500 ft. pounds 42,000 lbs. pressure

\* Probability internal threads will strip.

1. Prevailing resistance to loosening torque is an indication of the resistance of TAPTITE screws to loosening under vibration without the heads being seated  
 2. Recommended tightening torque induces approximately 30,000 to 50,000 psi (210 to 345 MPa) clamping stress.

† Probability screw will break  
 ① and ② See NOTES

Values shown are for conditions stated only! Thicker or thinner, harder or softer materials, different hole sizes with resultant higher or lower thread percentages and finishes other than cadmium plate, all contribute to variations in torque performance. Consult our Engineering Department for specific application data. Above figures are guidelines only.

## HOLE SIZES\* FOR WOOD SCREWS

### Pilot Holes

Pilot holes for wood screws are recommended, especially for hard woods. They greatly lessen the possibility of damage to screws and to the wood. The hole in the first piece of wood should be bored large enough to accommodate freely the screw shank.

In the the second piece of wood the hole should be slightly smaller than the screw shank, as shown in the chart below. The hole depth should be about one-half the length of the screw in the second piece of wood. the length of the screw chosen for the job will properly be at least an 1/8" shorter than the combined thickness of the wood.

Screw Size	Pilot Hole (A)				Shank Clearance Hole (B)		Counter Sink (C)
	Hard Woods		Soft Woods		Twist Bit (Nearest size in fractions of an inch)	Drill Gauge No. To be used for maximum holding power	Number of Auger Bits To counterbore for sinking head (by 16ths)
	Twisted Bit (Nearest size in fractions of an inch)	Drill Gauge No. To be used for maximum holding power	Twist Bit (Nearest size in fractions of an inch)	Drill Gauge No. To be used for maximum holding power

1. Because conditions differ widely, it may be necessary to vary the hole size slightly to suit a particular application. 2. Type AB screws, because they offer wider versatility of application, are recommended over Type A screws. 3. Decimals shown are standard drill sizes, rounded to nearest 0.001 inch. 4. Hole sizes shown in **bold** face type apply to Type B only.

1. Because conditions differ widely, it may be necessary to vary the hole size slightly to suit a particular application. 2. Type AB screws, because they offer wider versatility of application, are recommended over type A screws. 3. Decimals shown are standard drill sizes, rounded to nearest 0.001 inch. 4. Hole sizes shown in bold face type apply to Type B only.

Suggest Max Torquing Values- a guide based upon industry tests on dry products wiped clean.

Values thru 1" diameter are stated in inch pounds, over 1" diameter in foot pounds.

The 3/8" diameter and under metal products were roll-threaded and, where size range permitted were made on bolt maker equipment.

inch pounds to foot pounds multiply by 12

foot pounds to inch pounds divide by 12 may not be suitable for your application

POINT OF SCREW	SCREW SIZE DIA.	Material Thickness Guidelines For Self-Drilling Screws										DRILL SPEED RPM*
